

IEEE Computational Intelligence Society Distinguished Lecturer Program

Speaker: Jie LU, University of Technology Sydney, Australia

Inviting Chapter: IEEE Computational Intelligence Society Thailand Chapter

Date: 15 June 2022

Number of Participants: 63 People

Lecture Title: Fuzzy Transfer Learning

Abstract:

This talk will describe how fuzzy transfer learning can innovatively and effectively learn from data to support data-driven decision-making in uncertain and dynamic situations. The core idea behind fuzzy transfer learning is to leverage previously acquired knowledge to assist in completing a prediction task in a related domain by integrating fuzzy techniques with the transfer learning process. A set of new fuzzy transfer learning theories, methodologies, and algorithms is introduced, which transfers knowledge learned in one or more source domains to target domains. The fuzzy transfer learning set incorporates:

(1) a fuzzy refinement domain adaptation algorithm by utilizing the fuzzy system and similarity/dissimilarity concepts to modify the target instances' labels for classification; (2) fuzzy rule-based systems with mapping functions by building latent spaces to facilitate knowledge transfer for regression tasks in both homogeneous and heterogeneous scenarios; (3) unsupervised domain adaptation, to recognize newly emerged patterns in target domains that may be unlabelled. Patterns in target domains are recognized by leveraging knowledge from patterns learned from source domains and solutions to heterogeneous unsupervised domain adaptation via ndimensional fuzzy geometry and fuzzy equivalence relations. These new developments can enhance data-driven prediction and decision support systems in complex real-world environments.

APNNS/IEEE-CIS Education Forum Series:
**Deep Learning and Artificial Intelligence
Summer School 2022 (DLAI6)**
14 - 18 June 2022, Online virtually (ICT time)
EVENT TIME!

Day 2: Wed 15 Jun 2022 (ICT time UTC+7)

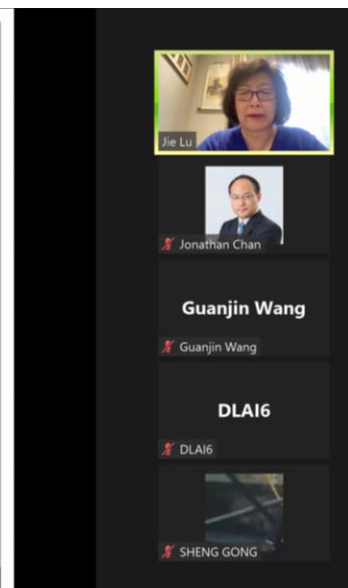

Time	Activity
IEEE-CIS Distinguished Lecturer Talk II	
08.00 - 09.00 am.	Speaker: <i>Jie LU</i> , University of Technology Sydney, Australia Topic: Fuzzy Transfer Learning
Academic Talk	
09.00 - 10.00 am.	Speaker: <i>Guanjin (Brenda) Wang</i> , Murdoch University, Australia Topic: Learning from imbalanced data and case studies in healthcare
Academic Talk	
10.00 - 11.00 am.	Speaker: <i>Jagdish Chand Bansal</i> , South Asian University New Delhi, India Topic: Drone Swarm: Concept, Challenges and Applications
11.00 am. - 12 noon	Lunch Break, Group Photo and Networking
IEEE-CIS Distinguished Lecturer Talk III	
12 noon - 01.00 pm.	Speaker: <i>Hisao Ishibuchi</i> , Southern University of Science and Technology, China Topic: Fair Performance Comparison of Evolutionary Multi-Objective Optimization Algorithms
Academic Talk	
01.00 - 02.00 pm.	Speaker: <i>M. Tanveer</i> , Indian Institute of Technology Indore, India Topic: Large Scale Machine Learning Algorithms and Applications to Alzheimer's Disease (bio)
Academic Talk	
02.00 - 03.00 pm.	Speaker: <i>Qi Sun, Bei Yu</i> , Chinese University of Hong Kong, Hong Kong, China Topic: Fast and Efficient Deep Learning Deployments via Learning-based Methods (Prof. Bei Yu's bio)
Academic Talk	
03.00 - 04.00 pm.	Speaker: <i>Lipo Wang</i> , Nanyang Technological University, Singapore Topic: Deep Learning for Image Classification
Academic Talk	
04.00 - 05.00 pm.	Speaker: <i>Chakarida Nukoolkit</i> , King Mongkut's University of Technology Thonburi, Thailand Topic: Data science concepts with case studies in health monitoring systems

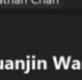

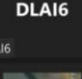

Table of Contents

1. Motivation and Introduction
2. Fuzzy Transfer Learning Concept
3. Cross-Domain (single source) Fuzzy Transfer Learning Methods
4. Cross-Domain (multi sources) Fuzzy Transfer Learning Methods
5. Applications and Summary

Jie Lu, UTS
6/15/22

 Jie Lu
 Jonathan Chan
Guanjin Wang
